

1. All code to generate the results in your project
 - a. <https://github.com/jwguanusc/CSCI567-FINAL/tree/main>
2. If you created your own dataset, include the dataset. If you used a ready-made dataset (e.g., from Kaggle), include a link to the dataset.
 - a. <https://www.kaggle.com/competitions/house-prices-advanced-regression-techniques/overview>
3. A list of commands used to generate all of your results. You do not need to explain the code in detail, but make sure it's clear how all the results in your report were generated.
 - a. jupyter notebook
 - b. Pick cs567_project
 - c. Run

Run All Cells
